Requirements for filling of bulk fuel tanks

Dear Prospective Customer

Thank you for considering Tropic Distributors as preferred supplier of your fuel and lubricant requirements

Before proceeding with opening an account, we have to make you aware of Tropic Distributors Workplace Health and Safety obligations regarding the filling of bulk fuel tanks. Our Drivers have been instructed not to fill any tanks they deem to be in an unsafe condition or location. Tanks must also meet the following minimum requirements. Diesel tanks must be fitted with bottom fill and sight gauge and petrol tanks must have a secure ladder fitted where the top of the step or platform must be no higher 1.95mtrs from ground level and the tank height no higher than 3.0 meters. Attached are some examples of requirements

After approval of this application, our Wholesale Marketing Manager will visit and inspect the tanks to ensure that tanks are compliant to our regulations.

Once the tanks have been inspected, if they are found not to be of an acceptable level, the Wholesale Marketing Manager will inform you of what is required to ensure tanks are up to the acceptable standard for filling. We also offer services to ensure that your tanks are able to meet these requirements is two different forms depending on work required which are:

1. Tropic Distributors can supply and in some circumstance fit the required kit to your tank for a set price.
2. Tropic Distributors can supply the required parts for the customer to fit at a set price.

The Wholesale Marketing Manager can discuss this with you on the day when carrying out the tank inspection.

For any further information please feel free to contact Tim Pearson on 0437 028 227

We value your business but want to make sure we meet our Workplace Health and Safety obligations both to yourself and our staff.

Yours Sincerely,

Tim Pearson
